

Irrigation Account Tools

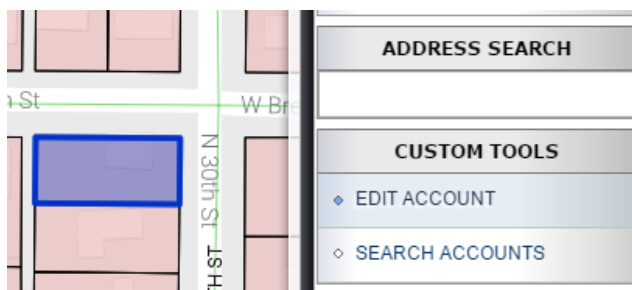

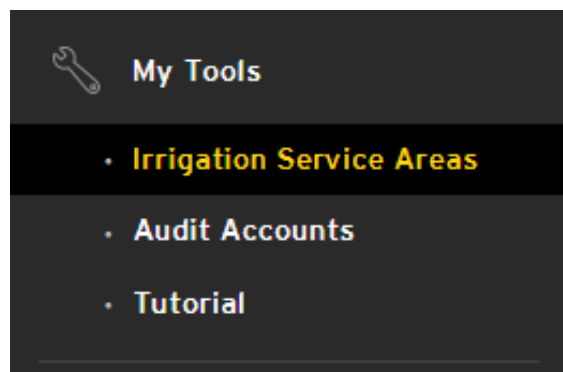

Your private irrigation accounts data includes:

- Irrigation District outline
- All Parcels located within the irrigation district boundary
 - Blue Parcels – Current Water Users
 - Green Parcels – Potential Water Users
 - Red Parcels – Non-water parcels within the irrigation district
- Hydro-lines from the US Census Bureau data imported to your custom ***My Company Data*** layer.

Additionally, the ***Irrigation Accounts*** layer is an editable layer containing shareholder account data to help manage water users within the district. To access these layers:

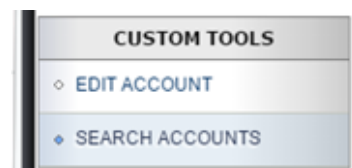

- 1.) Login to **landproDATA** with your unique username and password.
- 2.) Hover over the **Custom Tools** menu dropdown.
- 3.) Click on the **Irrigation Map** to zoom into your district area.

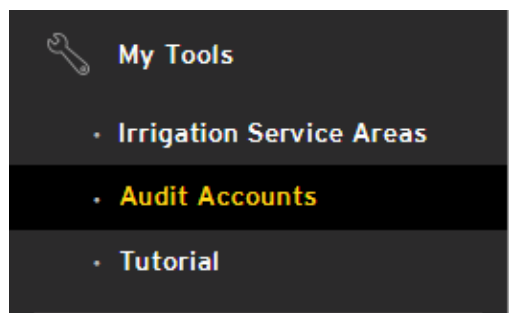

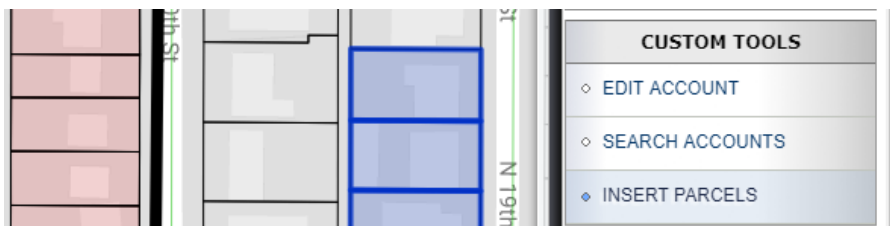

Once the map is loaded, you can zoom, pan, search for addresses, and select account parcels using the map navigation tools. To Edit a Water Account:

- 1.) Select a single Red, Blue, or Green Parcel within the irrigation district to highlight it in dark blue.
- 2.) Click on **Edit Account** under the Custom Tools submenu.

Within the map, accounts can be searched using a multiple-parameter **Search Accounts**. For example, you can search for all parcels with a particular owner, or select all Potential Users within a specific area.

If a serviced parcel is not included in the Irrigation Accounts layer, you can add it by selecting and highlighting the desired Parcels and clicking on **Insert Parcels** to import it to your Irrigation Accounts layer.

The **Audit Accounts** tool provides a review of all water user accounts data along with tools to download data in Excel. Use this to review new home constructions, parcel splits, and property owner changes. Most of these audits have instructions on how to resolve Irrigation Accounts with new changes to the **landproDATA** parcels database.

This is intended to provide a brief summary of the custom tools developed for the irrigation district to help maintain the water system and manage accounts of its shareholders.

As with all of our map tools, if you have questions or feedback about how these or any of our surrounding map tools work, do not hesitate to contact us at info@landproDATA.com and we will do our best to answer questions in a timely manner!
